Training Data Report

Training date: 2026-09-10

Training title	Training date	Training time
September 10 Training Plan	2026-09-10	15:40 - 17:36
Total duration	Participants	Valid data count
110'19"	23	23

Training Overview

This session included 23 outfield players with valid data. No goalkeepers were recorded, and no heart-rate abnormal players were flagged. The training was divided into five phases: Physical Training A1 through A5.

Training Data Summary

The team averaged 5443.79 m running distance, with an average heart rate of 137.22 bpm. High-speed distance averaged 550.72 m and sprint distance averaged 138.36 m. Average exercise load reached 124.9 and average exercise intensity was 1.14. Time above 80% HR was 20.53%, while time above 90% HR was 6.98%.

The session delivered a balanced aerobic and high-speed stimulus, with moderate overall load and broad participation across 23 outfield players.

Phased Training

Phase	Duration	Players	Avg HR	Load	Assessment
Physical Training A1	23'49"	23	125.83 bpm	15.16	Low
Physical Training A2	20'14"	23	150.26 bpm	38.48	High
Physical Training A3	27'43"	23	136.91 bpm	29.57	Moderate
Physical Training A4	20'41"	23	138.17 bpm	21.9	Moderate
Physical Training A5	17'51"	23	129.40 bpm	21.23	Moderate

A2 produced the highest cardiovascular and load response, while A1 served as a lower-intensity opening block. A3 through A5 sustained moderate training load with varied running output.

Training Load Analysis

High-load outfield players included No. 59 潘志毅 (222.97), No. 55 戴楷航 (177.08), No. 66 庄鑫源 (175.59), No. 98 陈炜权 (169.92), No. 34 欧阳汉霖 (168.0), No. 52 李世博 (166.0), and No. 71 孙泽钦 (165.24).

Low-load outfield players included No. 77 吴柏林 (36.06), No. 9 陈铭峰 (49.1), No. 10 吴越 (59.44), No. 85 杨喻斌 (68.46), No. 5 罗百康 (70.88), and No. 6 梁宇恒 (71.16).

Performance Analysis

Running volume. The squad averaged 5443.79 m, with **No. 20 邹子涵** leading at 6800.48 m. Strong outputs also came from **No. 2 邱长斌** (6271.56 m) and **No. 98 陈炜权** (6059.28 m). In contrast, **No. 6 梁宇恒** (3195.95 m) and **No. 77 吴柏林** (3754.68 m) recorded the lowest distances, revealing a wide individual spread.

High-intensity running. Average high-speed distance was 550.72 m, with **No. 2 邱长斌** (1085.70 m) and **No. 20 邹子涵** (922.86 m) well ahead. Average sprint distance was 138.36 m, led by **No. 52 李世博** (421.34 m), **No. 66 庄鑫源** (351.57 m), and **No. 36 林浩勤** (300.96 m). Several players recorded no sprint distance, which limited their high-speed exposure.

Speed. Maximum running speed ranged mostly between 7.2 and 8.6 m/s, with **No. 97 姚锦程** reaching 8.61 m/s and **No. 10 吴越** reaching 8.44 m/s. The lower end included **No. 77 吴柏林** at 5.14 m/s and **No. 6 梁宇恒** at 6.76 m/s, highlighting a need for individualized speed development.

Change of direction and braking. The highest combined high-intensity change-of-direction totals were recorded by **No. 7 周雨杨** (69), **No. 52 李世博** (67), and **No. 15 黄哲翰** (55). High-deceleration counts were also elevated for **No. 7 周雨杨** (19) and **No. 5 罗百康** (14), reflecting repeated braking demands. Lower outputs were observed in **No. 77 吴柏林** (15) and **No. 85 杨喻斌** (27).

Goalkeeper Analysis

No goalkeeper data were collected for this session. Because goalkeeping demands differ substantially from outfield running metrics, the current dataset does not support load or performance evaluation for the position. Separate goalkeeper-specific tracking is recommended for future sessions.

Key Conclusions

The session achieved organized physical conditioning with clear phase progression. The team showed solid running volume and high-intensity participation, led by a group of high-load players. However, several low-load players require closer support. A2 was the most demanding block and should be managed carefully within the weekly plan.

Brief Suggestions

Adjust training content to retain the A2 high-intensity conditioning block while building clearer recovery bridges into A3 through A5.

Provide targeted high-speed and sprint exposure for **No. 77 吴柏林**, **No. 9 陈铭峰**, and **No. 6 梁宇恒** to reduce individual load differences.

Add goalkeeper-specific load and technical monitoring in future sessions to ensure complete team coverage.

Glossary of key metrics

Heart rate

The number of heartbeats per minute.

Resting / baseline HR

Heart rate after waking, before activity.

Max heart rate

Maximum heart rate (MHR).

Exercise load

Load level using Stagno's Trimp, based on heart rate and duration. Higher load indicates rising fatigue.

Exercise intensity

Ratio of personal heart rate to age coefficient during activity.

Energy expenditure

Energy consumed during exercise, in kcal.

Exercise density

Ratio of main-part duration to total session duration.

Speed zones

- Walk/stand ($0.0\text{ m/s} \leq V < 1.2\text{ m/s}$)
- Jog ($1.2\text{ m/s} \leq V < 2.4\text{ m/s}$)
- Low-speed run ($2.4\text{ m/s} \leq V < 4.0\text{ m/s}$)
- Mid-speed run ($4.0\text{ m/s} \leq V < 5.5\text{ m/s}$)
- High-speed run ($5.5\text{ m/s} \leq V < 7.0\text{ m/s}$)
- Sprint ($7.0\text{ m/s} \leq V$)

Running distance

Total distance covered while on the field.

High-speed run distance

Distance at high-speed run pace while on the field.

High-speed run count

A high-speed run counts when speed stays in range for 0.6s or more.

Sprint distance

Distance at sprint pace while on the field.

Sprint count

A sprint counts when speed stays in range for 0.6s or more.

IMA - direction

Direction is classified from angle change between start and end velocity:
Start: angle change between -45° and 45°
Brake: angle change $> 135^\circ$ or $< -135^\circ$
Left turn: angle change between -45° and -135°
Right turn: angle change between 45° and 135°

IMA - intensity

Intensity is average acceleration during an IMA event:
Low: $\text{Intensity} < 3\text{ ms}^{-2}$
Medium: $3\text{ ms}^{-2} \leq \text{Intensity} < 6\text{ ms}^{-2}$
High: $\text{Intensity} \geq 6\text{ ms}^{-2}$

Top running speed

Highest running speed in a given period.
